***Allowable Subject Matter***

1. Claims 1, 2, and 5-13 are allowed.
2. The following is an examiner's statement of reasons for allowance: There is no teaching or suggestion in the prior art of the claimed combination having support means including a pair of axle brackets each having a ring portion wherein said pair of axle brackets are fitted on said pair of axle tubes adapted for mounting said axle housing to the base frame by coupling each axle bracket to the base frame wherein a thick portion projecting toward said housing body is formed on one of said pair of axle brackets such that the distal end of said thick portion is in contact with one of the left side surface and the right side surface of a convex repulsive force receiving member; and wherein said convex repulsive force receiving member is secured to only one of said pair of axle brackets by a repulsive force receiving bolt so that said body is supported by the base frame through the brackets re claim 7, there is no teaching or suggestion in the prior art of the claimed combination having a convex repulsive force receiving member extending generally vertically from the body of said differential housing wherein a through hole is formed in parallel with the axle tubes for receiving a fastener for coupling the body of said differential housing integrally with only one of said support brackets wherein a thick portion projecting toward said housing body is formed on one of said pair of axle brackets such that the distal end of said thick portion is in contact with the left side surface of the convex repulsive force receiving member, said fastener extending through said through hole and securing together the convex repulsive force receiving member and said one support bracket.
